

src/test/java/com/goldenleaf
/shop/GoldenLeafApplicationTests.java

```
graph TD; A["src/test/java/com/goldenleaf<br/>/shop/GoldenLeafApplicationTests.java"] --> B["org.junit.jupiter.api.Test"]; A --> C["org.springframework.boot.test.context.<br/>SpringBootTest"]
```

The diagram illustrates the relationship between a test class and its dependencies. At the top, a box contains the file path `src/test/java/com/goldenleaf/shop/GoldenLeafApplicationTests.java`. Two blue arrows point from this box to two separate boxes below. The left box contains `org.junit.jupiter.api.Test`, and the right box contains `org.springframework.boot.test.context.SpringBootTest`.

org.junit.jupiter.api.Test

org.springframework.boot.test.context.
SpringBootTest
